

Waukesha* gas engines Powering the world's gas compression needs

Canada -

gas processing

16V 275GL* engines drive compressors that transport gas from a remote processing plant to the main transmission station.

China -

gas gathering

VHP* L5794GSI engines are fueled by field gas at one of the oldest oilfields in the country.

Algeria -

gas injection

VHP* F3524GSI engines drive gas compressors at this oil and gas production site.

Indonesia -

gas transmission

VHP* L7044GSI engines drive reciprocating compressors at a combined cycle power plant.

Waukesha* gas engines Delivering the world's oilfield power generation needs

Russia - APG3000 generator sets provide prime power on field gas at a remote power station.

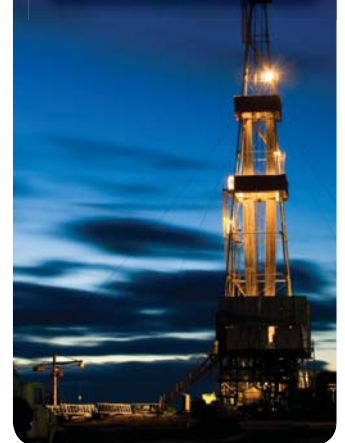

Colombia - VHP9500GSI generator sets provide prime power on field gas at a remote oilfield.

Peru - VGF18GSI and VGF24GSI generator sets provide prime power on field gas at altitudes up to 13,800 ft.

Siberia - VHP9500GSI generator sets provide prime power on low quality field gas for on-site power generation.
